

# AlgoTickets

the decentralised event tickets marketplace

# Problem

centralisation -> no user confidence

centralisation -> hard to resale

classic platforms -> big commissions

decentralised platforms -> no mass adoption

# Solution

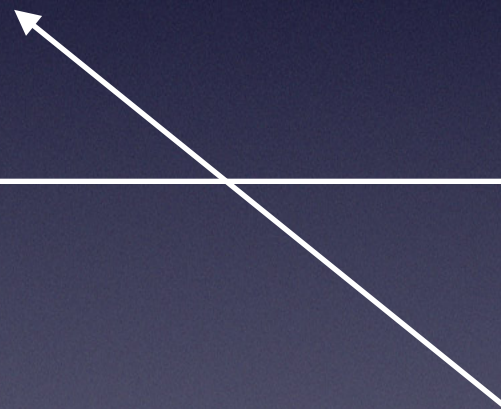

event

event

blockchain layer

classic layer

user

# Monetisation

events pay commissions to dApps in transactions

# Prototype

<http://127.0.0.1:5000/>

# SO ...

- users buy tickets via fiat
- users are confidential
- events pay less commissions
- **AlgoTickets** gets revenue
